Plant Engineer

The EVAPCO Group, an American Company founded in 1976, is the leading supplier of Evaporative Cooling Products for the Air Conditioning, Industrial Process Cooling and Industrial Refrigeration Markets around the world. EVAPCO products are at present produced in 17 factories around the globe. The European Headquarters are located in Tongeren, Belgium.

Function Description

Our Plant Engineer coordinates and manages the construction, modification, continued performance and maintenance of equipment and machines in an industrial plant

Day-to-day tasks,

- ✓ developing specifications for manufacture, and determines materials, equipment, piping, material flows, capacities and layout of our plants and systems;
- ✓ organizes and manages projects for our plant in general;
- ✓ establishes standards and policies for installation, modification, quality control, testing, inspection and maintenance according to engineering principles and safety regulations;
- ✓ Inspection of the plant to ensure excellent performance is maintained;
- ✓ Stears the maintenance of the plant buildings and equipment and coordinates the requirements for new designs, surveys and maintenance schedules.

Profile

To be successful in this function it is recommended to have either a Master of Science in Industrial Engineering or a Professional Bachelor degree with relevant experience in an industrial environment. You communicate well both verbally and in writing with colleagues, representatives and customers. A good knowledge of the English language is essential.

Offer
